Patients with chronic-degenerative diseases have found this alternative convenient for their organic and economic recovery. Being able to replace or alternate treatments that include corticosteroids, linear accelerators, surgical interventions or in general treat conditions with cutting-edge science yet experimentally without side effects documented so far.

\$48,000 MXN

¿What is Theraphi?

We create a “cloud of charge” with the key frequency of the golden mean ratio, a frequency known in the life force known as Chi, Prana, Ipalnemohuani, Nyama, etc. It is bioavailable cold atmospheric plasma.

¿How does it work?

With a Tesla coil, we generate a scalade of frequencies present in the natural cycles such as photosynthesis, the sodium potassium pump, the Schumann resonance and even the galactic year; This is an infinite implosion force that is being researched as the cause of gravity, a precursor of the universe in the fractal-holographic theory.

¿Where does it come from?

This type of plasma has been researched by highly prestigious academic institutions for more than 30 years, but it has existed for more than 100 years... Just as we know Nikola Tesla in electricity, we can recognize Royal Rife in non-invasive medicine. More information on our site Theraphi.mx
